DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of species 1 in the reply filed on 22 August 2007 is acknowledged. Claims 6-8, 13 and 14 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 2, 4, 5, 9 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Coburn et al, 3,794,314, cited by applicant. Please refer to figure 6 and column 2, lines 10-46.

4. Claims 1-4, 10 and 12 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Belly et al, 6,913,356. The examiner considers gasket **27** to have an annular portion that is flat, presenting a width that is at least three times greater than its thickness. Further, the bearing member, in the form of pins, are spaced annularly, and

without further defining structural limitations, can be considered an annular bearing member.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other similar devices are cited of interest.
